

# Digital Twin and Continuity

## Upskilling and digital tool training

Immerse yourself in the **Digital Twin and Continuity stream** and master the entire Digital Twin journey - from concept and creation to implementation and automation - with our microcredential courses.

This transformative pathway not only deepens your understanding of key industry phenomena but also empowers you to build and run your very own digital twin, giving you a competitive edge in the field.

*Developed by industry for industry, courses can be delivered online or face-to-face, with self-paced or instructor-led options available. Fundamental courses can be followed on by advanced courses, contact us for a discussion on learning pathways.*

# Introduction to Digital Twin

This course provides learners with a foundational understanding of the digital twin concept, its value and industry applications. Learners will gain knowledge and skills in how a digital twin can be applied to support business decision-making in an increasingly data-driven world. The coursework includes self-paced learning materials with videos, tool applications, case studies, recorded lectures, and peer reviewed journals for advanced learnings.

### Duration

15 Contact hours

### Suitable For

Engineers, Managers, Data Scientists
